

## **Supporter level member: Jim and Judy Gowland**

"Jim and Judy Gowland have farmed in the GTA (Greater Teeswater Area) for more than 40 years and have been involved with farm organizations locally provincially and nationally for the majority of those years.

Primarily a grains and oilseeds operation, "The Gowland's" focused on the highest quality that they could produce for local commodity markets and global food markets. To compliment producing their high quality products, Jim and Judy always put a high amount of emphasis promoting their product and production management from local elementary school tours, county school education events to provincial, national and international audiences and buyers through commodity organization involvement.

To further strengthen that "farm to fork" relationship, Jim served as a director on Farm and Food Care Ontario and Jim and Judy's farm operation continues to be a supporter member of FFCO. "The Gowland's" philosophy is that any type of agricultural business needs to interact through respectful listening, positive dialogue and to continue building a genuine trust with the public consumer and related stakeholders. For Jim and Judy, Farm and Food Care Ontario is definitely that united voice
