Trillium Mutual Insurance

"Recognizing that Farm & Food Care is an agricultural industry influencer, becoming a member was an easy decision for us at Trillium Mutual Insurance. We respect and value the services that they provide to the farming community as well as the education they offer to those without an agricultural background. We have been fortunate to experience the 'Breakfast on the Farm' series both from a sponsor and from a volunteer position.

Our focus is to understand the changing needs of today's farmer whether it be driven by technology, regulations or weather. We use this information to strengthen our farm insurance products to mitigate/eliminate the financial risk associated with farming. Couple that with our Real Ontario Farm Brokers, accredited experts in farm insurance and you have a farming community that can focus on farming. Farm & Food Care provides a great networking environment for any business with ties to the Ag sector."

Larry Holmes, Trillium Mutual Insurance
